Freelacing
Self-Employed
Achievements/Tasks
- HTML, CSS, JS, WordPress
- https://shubhamkumar7880.github.io/modern_coal/
- Developed a coal business custom software with HTML, CSS, and JavaScript using a third-party GST API to render the name and address of the customer. Along with that, many functionalities were added like fetching the bill details to google Sheets, local staorage and many more.
- Along with that, developed 2 business websites using wordPress.
- https://weitsolution.com/
- https://filshpearl.com/

SKILLS

ReactJS   NextJs   JavaScript   CSS   BootStrap
HTML   WordPress

PERSONAL PROJECTS

Great Quotes (Quotes Keeper App).
- https://data-31c22.web.app/quotes
- Tech Stack: ReactJS, React Router, CSS Modules, Firebase.
- It is a single-page application in which we can add and keep different quotes along with their author name.
- We can also view these quotes in detail, and also comment our thoughts on that particular quote. All quotes are stored in firebase database and also, these quotes are fetched directly from the firebase on the app. This appis hosted on Firebase.

Bhoj (Food Ordering App).
- https://bhoj.vercel.app/
- Tech Stack: ReactJS, CSS Modules, Firebase.
- This is a food ordering app made using React-JS in which we can order food. It includes almos tall features that a basic E-commerce appcontain has, like adding items to cart, removing items from cart, increasing or decreasing cart items,order modal and order details form.
- All ordered data are stored in firebase database and all meals and their prices are fetched from firebase database onthe app. This app is hosted on vercel.

React-meetups(Meetup App).
- https://react-meetups-phi.vercel.app/
- Tech Stack: NEXTJS, CSS Modules, Router, MongoDB
- It is a single-page application in which we can add and schedule different meetings with their picture, location and the meeting description.
- We can also view these meetings in detail. All meetings details are stored in the MongoDB database and also these meetings are fetched directly from the MongoDB on theapp. This app is hosted on vercel.
